AccountsResource

POST /api/accounts

createAccounts (createAccountsUsingPOST)

Consumes

This API call consumes the following media types via the Content-Type request header:

- application/json

Request body

accounts [Accounts](#) (required)

Body Parameter — accounts

Return type

EntityModel«Accounts»

Example data

Content-Type: application/json

```
""
```

Produces

This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- application/json
