GendersResource

POST /api/genders

createGenders (**createGendersUsingPOST**)

Consumes
This API call consumes the following media types via the Content-Type request header:

- application/json

Request body

genders **Genders** (required)
Body Parameter — genders

Return type
EntityModel«Genders»

Example data
Content-Type: application/json

```
""
```

Produces
This API call produces the following media types according to the Accept request header; the media type will be conveyed by the Content-Type response header.

- application/json
